Profile

Front-End Developer with proven experience in building fast, responsive, and user-focused web applications using **React** and **Next.js**. Proficient in **JavaScript**, **HTML5**, and **CSS3**, with a strong eye for design, performance optimization, and scalable front-end architecture. Passionate about clean code, modern UI/UX best practices, and continuous learning in a fast-evolving tech landscape.

Technical Skills

- **Frontend Development:**

- HTML5, CSS3, JavaScript, TypeScript
- React.js, Next.js, React Native, ReduxToolkit
- Tailwind CSS, Bootstrap, Material UI
- Responsive and Mobile-First Development

- **Development Tools & Methodologies**

- Git, GitHub
- Figma, Adobe XD (UI/UX Design)
- Performance Optimization, SEO Best Practices

Education

Computer Science, [Faculty of Science - Cairo university]

2021 – present

I chose to prioritize my career alongside my academic education, allowing me the flexibility to gain practical experience while studying. This decision enables me to take a full semester off if needed to focus on professional opportunities.

Work Experience

Frontend Developer (Remote Client)

Aug 2023 – Feb 2024

- Developed interactive e-learning platforms with React.js, improving student engagement by 30%.
- Integrated RESTful APIs with Express.js and Node.js, ensuring smooth data flow between frontend and backend.
- Integrated RESTful APIs with Express.js and Node.js, ensuring smooth data flow between frontend and backend.
- Followed Agile methodologies, coordinating with stakeholders to align project goals.

Frontend Developer (Remote)

Goo-Web | Dec 2023 – Jun 2024

- Worked remotely with Goo-Web on a cinema management system project
- Built responsive and interactive user interfaces using **React.js**, **Tailwind CSS**, and **Redux Toolkit**
- Focused on performance optimization, accessibility, and delivering a smooth user experience across devices

Courses

Front-End Development Course — Goo-Web Company

- Covered HTML, CSS, JavaScript, React.js, Redux Toolkit, and Tailwind CSS
- Applied modern front-end practices through real-world projects
- Worked collaboratively using Git and Agile methodologies

Object-Oriented Programming

- Abdel Nasim (2023)

User Experience

- Mahara Tech (2023)

Projects

GLOO-MARKET(REACT.JS-REDUX toolkit)

- Developed the front-end for Gloo Market, a modern e-commerce platform with a clean, responsive, and user-friendly UI. Focused on performance, scalability, and intuitive design to ensure smooth navigation, fast loading, and enhanced user engagement across all devices.

MOVIES(REACT.JS)

- Developed the front-end for Movie App, a dynamic and responsive platform for discovering movies. Built with a clean, intuitive UI, the app ensures smooth navigation, efficient data handling, and fast performance. Applied best practices to deliver a scalable, maintainable, and engaging experience across all devices.

3ARABY(NEXTJS,FIREBASE)

- Developed the front-end for 3araby, a fashion platform with a clean, user-friendly design and full responsiveness. Integrated Firebase for real-time data, user authentication, and seamless interactions. Focused on performance, smooth navigation, and fast load times to deliver an efficient, scalable, and enjoyable shopping experience across all devices

TOOMIA (React Native + Firebase)

- Built a React Native (Expo) app for a small restaurant system at Cairo University with dual login (user/restaurant), Firebase-powered dashboard, real-time product management, and responsive UI using Tailwind CSS

SODFA (Next.js + Firebase)

- Developed a social storytelling platform with Next.js and Firebase, enabling anonymous story sharing with real-time updates, clean responsive design, and smooth user experience

Soft Skill

- Problem-Solving & Critical Thinking
- Communication & Team Collaboration
- Time Management & Agile Adaptability
- Self-Learning & Continuous Improvement
